

## Data Sheet

**Model:** 2/0F-LM-N

**Material:** Arboform  
Arboform is a natural material comparable to wood.  
The biodegradability of this material is confirmed.

**Dissolvement:** The dissolvement of this material depends on the soil conditions.  
The time of desintegration is comparable to wood.

**Surface:** The surface coating is nitrocellulose free, the base contains no more than 5% nitrocellulose in the solide phase. Halogenated organic compounds, environmentally harmful plasticizers or stabilizers with heavy metals were not utilized

### Dimensions

**Height:** 280 mm

**Diameter:** 190 mm

**Weight:** 0,6 kg

**Picture:**

**Additional notes:** The urns are made to be in accordance to the directive of the Association of German Engineers, VDI 3891 and emanate no threats for soil, ground water or sea
